The population of the city - 690,6 thousand people ( dated 1/1/2007).

## ***Geographical and natural potential***

Kriviy Rig is one of the richest on usefull fossils regions of Ukraine. The majority of well known deposits are connected with ancient breeds of the Ukrainian shield. The most important deposits are ore, brown coal, marble, dolomites (40 % of balanced supplies of Ukraine) talc and slates, read lead, mummy, read lead, ocher, mummies, building sands, loams, scandium, vanadium and about 40 elements of Mendeleev table the complex usage of which will allow to provide well-being for future generations of the Ukrainians.

Nowadays in Kriviy Rig three majour industrial types of iron ores are extracted: rich ores which are directly used in metallurgy, magnetite and the oxidized ferrous quartzite which require enrichment. Rich ores are located mainly among the oxidized quartzite, forming about 300 ore deposits. The content of iron in them is more then 46 %, harmful impurity is the hundredth share of percent. They extract it mainly by an underground method. The general explored savings of iron ores in Kriviy Rig constitutes more than 32 billion mlrd. tons. Besides in Kriviy Rig there is one of a kind decorating stone presented by radiant quartz - various natural "cat's-eye", "snake-eye", "falcon-eye", "tiger eyes" and jasper of Kriviy Rig.

Kriviy Rig is also rich on mineral waters both drinking medical, and medical (radonic, hydrogen sulphide, ferrous and the waters rich on iodine and bromine) for external purpose, which are almost alike with waters of Piatigorsk and Tsahubo to their chemical properties.

## ***The historical information***

The first official written mention about Kriviy Rig is found in the "List of the

founded post stations along river Ingulets from Kremenchug down to Kherson " and is dated by April, 27th (8th of May) year 1775.
